

DAILY OPERATIONS SECTION ROLL UP REPORT

BRANCH: Emergency Services

DATE: September 10, 2017

Note: If you don't have anything to report for an item, list NSTR: Nothing Significant to Report

CRITICAL SHORTFALLS (people, things, systems that prevent doing the mission. JFO response: Get it ASAP)

- NSTR
-

SHORTAGES: people, things, systems that you have a need and the capacity to use. Causes degradation, but not mission prevention. JFO response: Look into it and get as able.

- NSTR
-

CONCERNS (policy, procedure, organizational flow that you do not confidently understand. JFO response: Clarify and/or find someone knowledgeable to make contact.

- NSTR
-

KEY OBJECTIVES/TASKS NOT MET: IAP work that could not get done and why. JFO response: reprogram for subsequent Operational Periods or help eliminate the obstacles to achievement.

- NSTR

LOCAL OR STATE HOT ISSUES: what you hear or see from field staff that the JFO must be made aware. JFO response: Coordinate, clarify, or dispel.

- EPA air quality technical specialists conducted total volatile organic compounds (VOC) area monitoring with the TAGA mobile laboratory. The Manchester area, Lawndale Rd near Lyondell Basell, and on N. Witter St. between Pasadena Refining Systems Inc. (PRSI) and Kinder Morgan's Pasadena Terminal were monitored. The team detected benzene below levels of concern at all three locations. Additional monitoring will continue, in an effort to identify the source.
- EPA will complete sampling of the 43 Superfund sites potentially impacted by the storm by Tuesday. Preliminary analytical results should be available by Friday. A communications plan will be developed to ensure public messaging of the sampling can be delivered as soon as possible once preliminary data is available.

DAILY OPERATIONS SECTION ROLL UP REPORT

- The TAGA will continue to monitor around facilities including Huntsman, Eco Services Operations – Houston Plant, Goodyear, Flint Hills Resources – Houston Chemical Plant, and the TPC Group – Houston Plant. If significant readings are identified, additional monitoring will be conducted by the EPA field teams.

UNEXPECTED VIPS OR INTERACTIONS: Awareness. JFO response: *Share with leadership*

- NTSR
-

ESSENTIAL ELEMENTS OF INFORMATION: you desire info to shape your operations – i.e., when will power & wastewater treatment be restored in (area), etc. JFO response: *Find out and reply.*
